

Landscape Lighting

Did you know that Aspen Creek installs landscape lighting? Outdoor lighting enhances curb appeal; highlights the beauty of your landscape, illuminates walkways and improves the safety and security of your home. LED lighting is energy efficient, has a 20 year lifespan and comes with a generous warranty to protect your investment. We can also upgrade your existing fixtures with LED bulbs to improve the efficiency of your current system.

Winterize Your Irrigation System

To winterize your sprinkler system water needs to be removed from the mainline. Leaving water in your irrigation system in freezing conditions can cause damaged pipes. The basic winterization clears most of the water in your mainline, for extra insurance we recommend our pressurized service. With pressurized winterization we include the basic shutoff and then use compressed air to push water through the main, lateral lines, and sprinklers to clear out as much water as possible. Call our office to get on the schedule! Before rates go up in December.

Fall Cleanup and Leaf Removal

Let us help with your seasonal clean-ups! Leaf removal is important for your lawn health. Leaves left on a lawn can cause die back in as little as a week. Leaves left on a sidewalk, driveway or walkway can become slick and dangerous. Our clean-up crews can take off leaf removal from your honey-do list.
